PROFESSIONAL SUMMARY

Results-driven Software Developer and Systems Engineer with expertise in Java, Lua, C++, 3D rigging, and UI/UX design. Elected Class Representative bridging operations between faculty and large student cohorts. Proven track record in developing immersive digital assets, architecting backend data-storage systems, and optimizing gameplay mechanics. Leverages strong analytical problem-solving and cross-functional team leadership to deliver impactful technical solutions.

EXPERIENCE

Class Representative & Cohort Liaison | COMSATS University **Sep 2025 – Present**

Wah Cantt, Rawalpindi, Pakistan

- Serve as the elected, primary liaison bridging communications, academic scheduling, and operational logistics between university faculty and a cohort of 50+ students.
- Utilize project management and conflict resolution strategies to ensure academic alignment.

Independent Game Developer & Systems Engineer | Freelance **Jan 2017 – Present**

Remote

- Architect, script, and deploy complex multiplayer gameplay mechanics and physics interactions.
- Engineer robust backend data-storage systems to optimize long-term game stability.
- Develop high-fidelity 3D assets and animations leveraging Lua and Blender.

Technical Scriptor & 3D Animator | The Royal Majestic Theatre Company **Jan 2018 – Jun 2019**

Remote

- Engineered a complex, vector-based theater simulation for a full-scale digital production of "King Kong the Musical" within a multiplayer engine environment.
- Collaborated with creative directors to seamlessly translate theatrical concepts into interactive, digital reality.

Graphic Designer | Hawa Care non profit Organization **Jan 2020 – Oct 2025**

Houston, Texas, U.S.A.

- Designed high-impact visual assets and promotional layouts leveraging UI/UX design principles.

EDUCATION

Bachelor of Science in Computer Science **Expected 2029**

COMSATS University Islamabad, Wah Campus

- **Activities:** IEEE CUI Wah Mini Olympics, Project Hackathons, and Student Cohort Leadership.
- **Object-Oriented Programming (OOP):** Engineered a comprehensive digital marketplace Management Information System (MIS) utilizing advanced custom file serialization.
- **Discrete Structures & Applied Physics:** Focused on logical frameworks, computational mathematics, and electrical and computer engineering principles.

SKILLS

Languages & Technologies: Java, Lua, C++, Python, HTML/CSS, Blender, Roblox Studio.

Design & Architecture: Software Architecture, UI/UX, 3D Rigging & Animation, Canva.

Professional Competencies: Project Management, Conflict Resolution, Team Leadership, Strategic Communication.
